A circle is stored here, which can be filled with a picture via *Shape Format --> Shape Fill --> Picture.*

A text field is provided here to insert a text. If you want to insert a picture, you can do this via *Insert --> Pictures.*

The visible grey outline is a watermark which is not printed but serves as orientation. Please select the aspect ratio 100%!

Alternatively, you can create a rectangle under *Insert --> Shapes --> Rectangle* and then insert an image as a fill effect as above for the circles.

Tip: Set 'black' as the background colour so that the sticker stands out even less on the black hardware.

To ensure the exact positioning of the surfaces, please ALWAYS select 'actual size' when printing.
